

# MULTIDARK

## COLOUR LASER COPIER PAPER

TPL 100

### Application Instructions

#### Pre-application Notes:

- Choose a dark or bright coloured substrate made of 100% cotton
- Change your copier/printer settings to Heavy Card Stock.
- Load transfer paper so blank side receives the image.
- DO NOT reverse (flip or mirror) the image

#### Print your transfer

1. Holding the image side of transfer toward you make a small (1/4 inch) hard crease at the corner edge of the transfer.
2. Flip the transfer over and crease the same corner again but in the opposite direction.
3. Holding the backside of the transfer toward you gently tear the paper backing on the crease to separate the transfer from the paper backing.
4. Do not tear the transfer layer.
5. When you have made the tear, separate the layers and slowly peel the transfer just past the image. Stop there and realign the paper backing with the image layer.
6. Trim away the unprinted paper around your image.
7. Gently peel the paper backing from the transfer film.
8. Position imaged transfer film on the garment with the printed side face up.
9. Cover imaged transfer film with enclosed silicon paper. This is to protect the imaged transfer film. The silicone paper is reusable so do not throw away after use. Make sure the silicon paper covers the entire transfer, leaving no area the transfer uncovered.
10. On Cotton, press at 180-190°C. Use light pressure. Print for 20 seconds or 450°C. Print for 25 seconds.
11. Cotton blend garments, press at 170°C. Use light pressure. Printed for 25-30 seconds.
12. Polyester fabrics press at 145°C. Use light pressure. Print for 25 seconds.
13. Allow silicon to cool completely (at least 2 minutes) and peel when cool.

#### Garment Care / Washing

- Always turn garment / textile inside out before washing.
- Machine wash cold. Preferably hang dry.
- Do not use harsh or bleaching materials.
- Optional – Tumble dry with cool air setting.
- If garment needs ironing, DO NOT iron directly on the transfer.

#### Tips & Notes

- All copyright laws apply to the use of the MULTIDARK paper.
- Manufacturer and seller are not responsible for damage caused by misuse of this paper.

#### Storage Handling

Humidity level affects the performance of the colour laser copier and the paper. Best results are achieved at 50-70% relative humidity. Always keep the paper packed and sealed in the ZIPLOK bag until used. Return all unused paper to the bag and reseal.

Caution : Dampness in the paper will cause poor reproduction quality.
